

Pellini

eSmart

Unique
and Unmistakable

Pellini 'eSmart'

The **Pellini eSmart** project springs from our desire to branch into the **vending sector** as a “**quality partner**”, bringing **pleasure and wellbeing** to all those consumers who want to **enjoy high quality coffee** anytime and anywhere: in offices, shops, clubhouses or community centres, but also at home.

Capsule espresso machine

A **compact, high performance** machine: **sophisticated technology** combined with **attractive design**, suitable for all environments. The **user-friendliness**, with its **simple controls** and **easy-to-load** capsules and water tank, is matched with a **perfect result** like that of a **real espresso** from a bar.

Quality espresso

Our range of single-cup capsules is the fruit of **success with consumers** and the experience gained on the Ho.re.ca. and Retail markets, confirming the **superiority of our products**.

Pellini Top and Pellini Bio are 100% Arabic blends consisting of **premium quality** coffees selected directly in their place of cultivation. **Delicate roasting** gives a **harmonious flavour** and a **fragrant, delicate aroma**. The excellent quality and **low caffeine content** of the final product in the cup complete the profile.

We enforce **strict controls** in coffee roasting and blending. The special packaging process **ensures surprisingly fresh and long-lasting aroma and flavour**.

We can boast **ISO 9001:2000** and **UNI 10939** certification for production process traceability, and **IMC** certification for organic products. A “**tasting panel**” of **20 people** is devoted to constantly **analysing the product**.

Pellini strives to affirm its philosophy of excellence in vending machines too. The approach is summed up by the slogan ‘Pellini, Unique and Unmistakable’.

Technical details

Control buttons: 1 On/Off 2 Hot water 3 Coffee Dispenser/Lock 4 Cappuccino maker

- Hydraulic unit with vertical capsule feed
- Automatic used-capsule ejection
- Water shortage safety device
- Water pump pressure: 20 Bar
- Dispensed coffee temperature: ~ 82°
- Machine heating time: 1 minute
- Dispensing time for 1st coffee: 20 seconds
- 1.8 litre tank
- Collection tray for ~ 25 used capsules
- Thermostat temperature control
- Safety thermostat
- Electric power: 230 V, 50 Hz, 975 W
- Power cord: Rear
- Dimensions (L x W x H): 267 mm x 314 mm x 306 mm
- Weight: 10.5 kg
